

Dear Families,

Gratitude. It doesn't seem strong enough to communicate our feelings about our experience with UCP of the North Bay. We are the proud parents of a Cypress School alumni and one of the founding participants in the Marin Adult Day Program. We have been in the UCPNB family since 2011 and have many positive things to say about our time. What we think is most important is what our son Brooks has to say. He frequently talks fondly of staff, other peers, and activities he's participated in. He loves to say how "awesome" people or activities are and he's always excited to spend time up at school or program. For him to communicate this independently is a very good thing.

UCPNB has given Brooks the opportunity to experience a variety of activities we could have never imagined him doing, and loving. He has been free to be exactly who he is and has had the support to become the best version of himself. The UCPNB team is kind, accepting and meet our kids where they are.

We feel well supported as parents and feel like the team at UCPNB is committed to partnering with us. We are thrilled to have been on the ground floor of the first Marin Adult Day Program and we're excited to see it grow.

None of this would be possible without the support of our community. We support UCPNB to pass on the great experience we've had AND to help insure the continuation and growth of all the programs. We invite you to join us with a year-end gift.

Happy Holidays,

Beth & Barry Silver
